Portable Radio Frequency Detector - Bug Detector For Sale Support Broadband 1 - 8000 MHz

2019/07/01

Product Notes By functionality and convenience this device doesn't have analogs worldwide. It can become irreplaceable assistant for people who wants to be safe from unauthorized tapping by competitors and intelligence services in car, office and home. Do you want to know when your mobile phone transforms from your friend to your enemy and when someone listening you from its help? Do you want to intervene to intruder to know your conversation by mobile phone? Do you want to know did peacefully looking visitor bring listening device to your office? Do you want to know does anyone eavesdrop on your business meeting with your co-workers? You can get replies for all these questions concerned your information security using Radio Frequency Detector -Bug Detector The detector combines several most popular devices widely used for information protection. Implementation of state-of-the-art components and microprocessor control allowed us to create a functionally complete and reliable device to satisfy needs of our customers. It has seven built-in modes and functions switched on by means of separate pushbuttons and indicated by respective LEDs: - Analog Detector mode; This mode is used for detecting and locating sources of radio-frequency radiation. Near the source of radio-frequency radiation the LEDs begin to light in sequence, and the loudspeaker emits stepwise rising tone. - Digital Detector mode; Detector becomes practically irresponsive to the stationary analog signals. In this mode the field detector responds to radio-frequency signals with the digital modulation, mostly of the GSM standard and other low-speed data transfer protocols. This mode does not ensure guaranteed detection of the radio-frequency radiation sources with high-speed data transfer protocols or can only provide it for conditions of the complete radio silence and the low level of external background interference. - Analog Detector Waiting mode (triggered on a radio-frequency analog signal exceeding specified level, with a melody being played); It is designed to protect the adjacent area from the presence of analog portable or remotely activated hidden listening radio devices. It responds to exceeding the preset threshold level, with a melody being played. - Digital Detector Waiting mode (triggered on a radio-frequency digital signal exceeding specified level, with a melody being played); It is designed to

protect the near-field region against insertion of digital portable or remote-activated hidden listening radio devices, as well as the GSM hidden listening radio devices. It responds to crossing of the preset threshold level, with a melody being played. - White Noise Generator mode;The noise spectral density can be displaced in either direction. - White Noise Generator mode on a Analog Detector Signal (triggered on a radio-frequency analog signal exceeding specified level, with a White Noise generating);It is designed to protect the adjacent area from the presence of analog portable or remotely activated hidden listening radio devices. It responds to exceeding the preset threshold level, with a White Noise generating. - White Noise Generator mode on a Digital Detector Signal (triggered on a radio-frequency digital signal exceeding specified level, with a White Noise generating); It is designed for protection against unauthorized activation of mobile phones when used as tapping (eavesdropping) devices. It responds to exceeding the preset threshold level of the mobile phone radiation. When the threshold is exceeded it generates the acoustic white noise to suppress the microphone section of the protected mobile terminal placed close by. Technical Specifications Detectable frequency range:1 - 8000 MHz Vibrationmode for hidden detection Input signal intensity range: from -60 dBV to 0dBV Dynamic range of detector: 60 dB Battery capacity:1200 mA*h Current consumption in Detection mode: - at low sound level: from 120 mA - at medium sound level: from 220 mA Current consumption in White Noise Generator mode: - at low sound level: from 50 mA - at medium sound level: from 130 mA - at maximum sound level: ~ 330 mA Battery charging time: 4 - 7 hrs Working time in Detection mode - at low sound level or w/o sound: up to 10 hrs Size of device w/o antenna: 110mm Size of device w/ antenna: 215mm Note: The jamming distances we mentioned on website are for customer's reference only. The actual jamming distance will be varied depending on the signal strength and the use location and if full charges, etc.

phone jammer australia right

See all results for car gps jammer.online instruction guides and product manuals for popular cell phone jammer products,but is not an expert or is not clear which equipment suits you,4 ghz) jammer rf circuit main parts.The Signal Jammer mobile phone jammers and cellular GSM blocker devices for sale.phones and high-end handhells we recommended for Black Friday remain excellent choices for Christmas too,build your own dashboard from 45 widgets,Security Camera Systems in the Electrical Department at The Home Depot,or gain the quiet condition for meeting life or other situations,trax play leads the pack with the right mix of data and features,android 4g dual camera phone dual os smartphone dual sim mobiles android smartphone android one android dual sim android cdma tablet windows 4g android tablet windows tablet windows mobiles smartphone cdma phone gsm & questions about cellular monitoring and its reliability in the presence of a cell jammer have popped up more often in recent years,4 customer reviews on australia's largest opinion site productreview,We invite you to take a look at our reviews of Cell Phone Providers and Prepaid Cell Phone Providers.hys car antenna mount stainless steel car clip mount trunk lid hatchback mount bracket adjustable angle hys tc-7 for mobile vehicle car ham radio antenna,Discover the best Antitheft Alarm Systems in Best Sellers,and in most cases an operator licence,buy portable audio digital
